JORGE REINA

Full Stack & AI Engineer · DevOps & Security

Elche (Alicante), Spain · +34 633 380 269 · info@jorgereina.com · jorgereina.com · linkedin.com/in/jorgereinafl · github.com/JorgeReina-fl

PROFILE

Full stack developer who ships AI to production and also runs the infrastructure behind it: deployment, security and backups. Founder of mivia.es. Looking for a remote role, or hybrid in Valencia, Alicante or Murcia (Spain), as a Full Stack or AI Engineer.

EXPERIENCE

Founder & Full Stack Developer — mivia.es · Elche, Spain · Jun 2026 – Present

Software studio building in-house products and client projects, on infrastructure I manage myself.

- Mivia Obras: multi-tenant project management for renovation companies, with invoice reading (OCR) and voice-to-quote using Gemini. In production at a renovation company.
- Rugbytrack: rugby team management with real-time attendance, training load (RPE and ACWR) and similar-player search with embeddings (Gemini + pgvector). Used by the UMH rugby team.
- Infrastructure: Oracle Cloud (ARM) server with 16 Docker services behind Nginx, origin reachable only through Cloudflare, non-root containers and a self-hosted mail server (SPF, DKIM, DMARC).
- Security and operations: daily encrypted backups with an off-site copy and tested restores. Handled a production security incident: containment, credential rotation and hardening. CI with GitHub Actions.

Full Stack Developer — Freelance · Elche, Spain · Jul 2024 – Jun 2026

- EducaBea: educational content website; migrated the content from Sanity to PostgreSQL and added a newsletter with Resend.
- Multi-tenant admin panel (Next.js, Prisma, NextAuth): a single instance serves content, catalog and orders to several client websites, with a Gemini assistant.
- Alicatados JR: 24-page statically generated corporate website with GSAP animations and technical SEO, migrated from Vercel to self-managed infrastructure.
- Creative Lav Saho: custom-products store with a real-time visual editor (Fabric.js).
